

**Dr Androula NASSIOPOULOU** received her B.Sc. in Physics from the University of Athens in 1975 and her M.Sc. and Ph.D. from the University of Paris XI (ORSAY) in 1977 and 1980 respectively. She then moved to the University of Reims, France, from where she received the title of “Docteur d’Etat” in 1985. She is with IMEL at NCSR Demokritos since 1986. In 1997 she has been elected Director of IMEL by an international scientific committee and she became also member of the board of Directors of NCSR Demokritos. She has been member of the Greek National Research Council, an advisory board to the Ministry in the years 2001-2003, and she is currently member of the Expert Advisory Group of NMP-FP6. Her current research interests are in the field of semiconductor and metal nanostructures for nano- and optoelectronic devices, nanocrystal memories, sensors, microsystems and on-chip RF integration. She is at the head of the group of silicon nanostructures and their applications at IMEL. She is author or co-author of over 300 publications in International Journals, Reviews, books and Conference Proceedings. She has been or is being involved in an important number of EU and national projects. She chaired or co-chaired several National and International Conferences and Symposia.
