The Institute of Electronic Structure and Laser (IESL) of the Foundation for Research and Technology Hellas (FORTH), in the framework of the project QLUSTER, (Call: H2020-FETOPEN-2018-2019-2020-01, Grand agreement ID: 862035) which is a Research and Innovation action (RIA) funded under H2020-E.U.1.2.1. – FET Open, is seeking to recruit one (1) PhD student on theory of deterministic cluster state generation.

Job Description

This position will focus on the design and simulation of theory protocols for the deterministic generation of cluster and graph states for applications in quantum information science and technology. The successful candidate should have a background at the Masters level in the theory of graph states and on the physics of self-assembled quantum dots.

Required qualifications

- Bachelor's degree in Physics with GPA at least 7.8 (10%)
- Experience working on cluster and graph states (30%)
- Experience working on self-assembled quantum dots (40%)
- Experience working on entanglement purification (10%)

Desirable qualifications

- Programming experience (10%)

Location: IESL-FORTH, Heraklion Crete GREECE

Start Date (earliest): July 1, 2021

Project Duration: 2 years with possibility of extension according to the needs of the project

Application Submission
